### AGE SPECIFIC COMPETENCY SELF ASSESSMENT

This serves to clarify your experience and expertise in providing the appropriate care and instruction to patients of different age groups.

**EXPERIENCE WITH AGE GROUPS:**

- Able to adapt care to incorporate normal growth and development.
- Able to adapt method and terminology of patient instructions to their age, comprehension and maturity level.
- Can ensure a safe environment reflecting specific needs of various age groups.

Please check the boxes below for each age group – indicating the level of expertise you believe your experience providing age-appropriate nursing care.

AGE GROUPS	LIMITED	AVERAGE	HIGH
A. Infant and Toddlers (birth – 3 years)			
B. Young Children (4-6 years)			
C. Older Children (7-12 years)			
D. Adolescents (13-20 years)			
E. Young Adults (21-39 years)			
F. Middle Age Adults (40-64 years)			
G. Older Age Adults (65-79 years)			
H. Adults ages 80 & older			

This information I have given is true and accurate to my knowledge, I hereby authorize Nursefinders to release this AGE SPECIFIC PRACTICE CRITERIA and skills checklist to Client facilities of Nursefinders in relation to consideration of my employment with facilities.
