

APPLICANT CONSENT for DRUG SCREENING

As part of Nursefinders client commitment to a drug-free work environment, all applicants will be requested to take a urinalysis drug screening.

These tests will be conducted by a SAMHSA certified laboratory selected by Nursefinders. Test results will be completely confidential.

Applicants with "positive" test results will be informed of their results and will be denied placement.

I agree to take a urinalysis drug screening as part of my placement consideration, and understand that I will be denied placement if my test results indicate a "positive" result. I also understand that I may be requested to take a drug test at any time after my placement with a client of Nursefinders.

I release Nursefinders, its client(s) and its agents from any claims or liability resulting from the administration and reporting of results of my drug test.
